Dear

In 2008 Unilever management promised me that closing the final salary scheme to new members would safeguard my pension for the future. But only 18 months after making that promise they were starting to talk to advisors about closing the scheme forever and also attacking the benefits of the CARE scheme that they want me to transfer to.

I will lose thousands of pounds as a result of Unilever's broken promises – please don't let management ruin my retirement.

Your support is vital to STOP these unfair pension changes happening. I urge you to make Unilever rethink its pension plans.

Yours sincerely
