Remploy factories employ 2,800 disabled workers across the country. We are taking our message to Liz Sayce, chief executive of Radar, as the author of the report which is a blue print to close Remploy's 54 factories.

Disabled people are being hit hard by the government's savage cost-cutting policies and now the Sayce report recommends throwing 2,800 disabled workers onto the dole queue.

Remploy provides real jobs, real choice for disabled workers. Don't let them destroy it.
