To All Members of Network Rail

Dear Colleagues

As a Unite Representative working for a National Company it is imperative we utilise technology to our best advantage. This web page is an extremely important tool but without you it would not be a success. I have agreed to be the web page Co-ordinator amongst our national network of representatives and I hope to keep the site updated and relevant to Unite members at Network Rail.

There are several important topics on the agenda at the moment. Please feel free to contact your local representative via email with your views, they in turn will feed through the information to me.

This information will assist the Unite representatives to decide on what issues are really important to you and the process is designed to ensure that negotiations follow what the membership wants.

Yours fraternally

DON SEAMAN
