

HOW GREEN IS MY WORKPLACE?

THE IMPACT OF CLIMATE CHANGE AND ENVIRONMENTAL ISSUES

Issues to do with the environment and climate change have been rising up the agenda of governments, large and small companies and unions in recent years.

The Electrical Engineering, Electronics and IT sector of Unite has a unique position in the effort to reduce the carbon footprint of the economy. While the sector is and should continue to curb its own emissions, it is also at the forefront of developing technologies and solutions that can mitigate and reduce the environmental impact of many other sectors.

We have recently published a guide for members and representatives and now want to take this forward in workplaces in the sector, working with stewards and representatives.

- Why do we need to act now to adapt and mitigate the effects of climate change?
- What can we do about this in our workplace?
- How can we negotiate on this with our employer?
- What will happen if we don't take action in the workplace?

UNITE IS HOLDING A WORKSHOP TO ADDRESS THESE ISSUES

Wednesday 16 July 2008

Venue: Unite Head Office, 35 King Street,
London WC2E 8JG

10.30am - 4.00pm

Unite Workshop on the Impact of Climate Change and Environmental Issues

Please reserve places for this on 16 July 2008

Name of organisation: _____

Address: _____
