

Let's Talk Topics

The idea of Let's Talk events is that they are not prescriptive about the subject matter. You may have a very specific debate in mind that affects a particular part of industry or your workplace. You may also want to debate a wider area that will cover a number of different workplaces.

Below are some examples of areas that you could hold a Let's Talk event about. It is up to you whether you pick one of these or chose another area that affects Amicus members. You could also pick one of the headings below but focus on one aspect of it – it is better to have a focused debate and specific points in the submission that are informed by members' experience and understanding of the area.

- Equality and Diversity in the Workplace
- The future of Manufacturing in the UK
- Globalisation
- Health Service
- Pensions
- Equal pay
- The role of the voluntary sector
- Skills and Lifelong Learning
- Energy Industry and the environment
