

Save Lincoln Microbiology Laboratory

Dear Mr Walker

I am writing to register my opposition to the United Lincolnshire Hospitals NHS Trust's proposal to close Lincoln Microbiology Laboratory.

If these plans go ahead, tens of thousands of samples will have to be transported over 30 miles resulting in soaring transport costs and extra local traffic. The closure will put in jeopardy the excellent speed and quality of service that this lab provides.

I am very concerned there has been no public consultation and would urge you to drop the plans to close the lab.
