FOR A BETTER FUTURE

ONLY LABOUR BACKS UK MANUFACTURING WORKERS

08.06.2017

For working people, there can only be one choice.

On June 8, vote Labour.
VOTE FOR A FUTURE FOR MANUFACTURING JOBS

Labour is committed to working for you in the UK’s Manufacturing Industries.

Unite believes that a strong and vibrant manufacturing sector is vital to the long-term and sustainable growth of the UK economy.

Prosperity lies on a workforce that is highly trained and skilled – not one based on low pay, insecure jobs and poor skills and training.

The Tories have failed manufacturing in the UK.

The only way to fully support UK manufacturing is to vote for a Labour government.

LEN MCCLUSKEY UNITE GENERAL SECRETARY SAYS:

“Labour is committed to an industrial strategy that invests in apprenticeships and skills; which looks to the long-term to generate the decent, secure jobs our members want and their children need in the future; while also ensuring that we have an economy that works for the many and not just the few.”

YOUR VOTE WILL MAKE THE DIFFERENCE

Thursday, 8th June will be a crucial day for every manufacturing worker in the UK.

On every issue Unite members have said is important to them, the Labour party best serves your interests – on future investment, sustainable growth and decent, high-skilled jobs.

LABOUR IS COMMITTED TO:

- Delivering a fairer, more prosperous society for the many, not just the few.

- An industrial strategy that supports businesses to create new, high-skilled, high-paid and secure work across the country.

- A National Transformation Fund that will invest £250 billion over ten years in infrastructure and upgrading our economy.

- Investment that is fairly shared around every region and nation of the UK.

- Supporting UK supply chains by targeting government support where there are gaps.

- Using procurement to upgrade our economy, support strategic industries, create decent local jobs and reduce inequality.

- More investment in research and development.

- Capping energy costs and investing in new publicly owned energy provision.

- Increasing the number of high quality apprenticeships including more apprenticeships for women.

- Negotiating a new deal with Europe that puts jobs and the economy first – remaining in the single market and customs union to protect jobs and investment.

FOR WORKING PEOPLE, THERE CAN ONLY BE ONE CHOICE.

ON JUNE 8, VOTE LABOUR.
